 - am I talking to a human?

Bot Reply: I am a bot, My name is Bot-X and I'm here for your assistance.

8. (thanks intent)
- thanks
 - thank you
 - appreciate it
 - gracias

Bot Reply: Thank you for using the chatbot.

9. (miscellaneous intent) (note: that includes anything that the user enters randomly which is not specified in the chatbot)

Bot Reply: - Im Sorry, I didn't quite get you.

- Sorry, I'm not authorized to do that.
- Sorry, that is unavailable

10. (aboutinvest intent)

- what are stocks
- details on stock market
- stock market
- information on stocks
- info on stock marketing

Bot Reply: - The stock market is essentially a platform where people can buy and sell ownership shares of publicly traded companies. Imagine it like a big marketplace where these shares, called stocks or equities, are traded. When you buy a stock, you're essentially buying a small piece of ownership in that company. The value of these stocks can go up or down based on various factors like the company's performance, industry trends, economic conditions, and investor sentiment. Investors buy stocks hoping that their value will increase over time, allowing them to sell for a profit. The stock market serves as a crucial component of the economy, providing companies with a way to raise capital and investors with opportunities to grow their wealth.

-The stock market is a place where investors can buy and sell ownership stakes in publicly traded companies. It's like a big marketplace where stocks, which represent ownership in companies, are traded. When you buy a stock, you're essentially buying a small part of that company. The stock market is influenced by a variety of factors, including the performance of individual companies, economic indicators, geopolitical events, and investor sentiment. Prices of stocks can go up or down based on these factors, and investors aim to make money by buying low and selling high. The stock market plays a crucial role in the economy by providing companies with capital for growth and offering investors opportunities to build wealth over time.

(Expected Bot Reply are some information about stock market)

11. (wanttoinvest intent)

- I want to invest
- Suggest me companies to invest
- Suggest me stocks to invest
- I'm ready to invest
- Lets invest
- Lets do stocks

Bot Reply: Great ! I would like more information to perfectly suggest companies according to your needs.

Firstly: How much money (in Rupees) are you willing to invest?

User Reply: (Expected reply from user is a numerical value, anything else should display the miscellaneous intent) eg:

- 100000
- 120000 rupees
- 30000 rs
- Rs 40000

Bot Reply: Secondly: For how many days are you willing to invest?

User Reply: (Expected reply from user is also a numerical value, anything else should display the miscellaneous intent) eg:

- 3
- 10 days

Bot Reply: Lastly: What is the Risk Factor that you are willing to uphold ?

User Reply: (Expected Reply from user is a numerical value between 1 and 10, anything else should display the miscellaneous intent)

- Eg:
- 5
 - Risk of 7
 - 6 risk
 - risk=2

Bot Reply: (Expected Output from the Chat bot are company suggestions and suggest how to split the money that the user wants to invest among different companies inorder to get maximum returns within the number of days specified by the user based on the output obtained from the trained LSTM model.

Also display the predicted graphs of these companies for the analytical part)

Eg: **Bot Reply:** Based on your inputs, here are some company suggestions you can invest in.

	Company Name	Amount to Invest	Expected Returns (in percentage)
a.	Company A	33500	12.34
b.	Company B	27700	7.8
c.	Company C	18800	6.96
d.	Company D	13000	6.03
e.	Company E	7000	6.4

Total: 1,00,000 Rs
Expected Returns: 1,08,834.88 Rs

(Note:Here let the user want to invest 1,00,000 Rs)

Graphical Analysis

(Also chatbot Expected to display the predicted graphs of all the above mentioned companies as the analysis part)

12. (whatisriskfactor intent)

- What is Risk Factor
- Explain Risk Factor
- Whats risk rating
- Explain risk rating
- Risk factor

Bot Reply: Risk Factor is a value between and including 1 and 10 such that a lower rating suggests that you are not willing to invest in companies that are not profitable currently but are predicted to be profitable in the near future (i.e. You required assured profit).

A higher rating suggests that you are ready to invest in companies that are currently downhill but is predicted to go uphill in the future (i.e You have variable profit, profit can be too high or you could incur a loss)
